Wheat futures ended the week mixed with dry weather in the U.S. Plains supporting KCBT and CBOT wheat. A strong U.S. dollar, which makes U.S. wheat less competitive against other origins, limited gains in those markets and pressured lower. CBOT wheat futures gained by USD 2/MT on this week to closed at USD 167/MT and KCBT wheat futures also gained by USD 5/MT and closed at USD 173/MT (U.S. wheat Associates, March 3rd, 2017).(Table-2 & 3).

RICE

- Global rice export for 2016/17 is forecasted in February at 41.51 million MT, up 3.1% from a year earlier (USDA, February, 2017).
- Global trade is up, with larger imports for the United Arab Emirates and Brazil. Exports are raised for India, Thailand, and Burma. Global stocks are revised slightly lower, but are still the highest in 15 years.
- The 2016/17 domestic and residual use forecasts were raised for South Korea, the UAE, and Kazakhstan. On balance, these revisions lowered the 2016/17 ending stocks forecast 1 percent to 118.0 million tons, still the highest since 2001/02. The 2017 global trade forecast was increased 2 percent to 41.5 million tons, the first increase since 2014. Export forecasts for 2017 were raised for India, Thailand, and Burma. Thailand's trading prices dropped about 1 percent over the past month while Vietnam's increased slightly.

WHEAT

- Wheat export for 2016/17 is forecasted in February at 178.30 million MT, which is about 4% higher than the previous years' forecast (USDA, February, 2017).
- Global trade is boosted to a new record with higher imports for China, Morocco, and Vietnam more than offsetting cuts for Ethiopia, EU, and South Korea. Larger exports for Argentina, Ukraine, and the United States are partially offset by reductions in Kazakhstan and Russia (USDA, February, 2017).

Global wheat trade is expected to increase, led by the United States and Ukraine. Production shortfalls in India and Kazakhstan are responsible for lowering global wheat output projections this month, though it remains a record high.
