RICE

- Global rice export for 2021/22 projected in September at 48.01million MT, which is 0.4% lower than the projection of a year earlier (USDA, September 2021).
- Global rice trade in the calendar year 2022 is projected up from the previous forecast but below the year-earlier revised near-record. This decline is the result of much weaker imports of Indian rice by Bangladesh. Exports are projected to increase from Australia, Brazil, Burma, Cambodia, EU, Pakistan, Paraguay, Thailand, and Uruguay while exports are projected to decline for India and the United States.
- For imports, Angola, Colombia, Costa Rica, Cote d'Ivoire, Egypt, Ethiopia, EU, Iran, Iraq, Kenya, North Korea, Madagascar, Mozambique, Nepal, Nigeria, Qatar, Senegal, and the United States account for most of the expected increase in 2022.

WHEAT

- In the 2021/22, world wheat trade projected in September at about 200.92 million tons, which is 2% higher than the previous year's export (USDA, September 2021).
- Global trade is forecast higher with stronger exports for Australia and India with imports raised for Bangladesh, Iran, and Kazakhstan, while exports are up for Australia and India (USDA, September 2021).

Bangladesh wheat imports have nearly tripled over the past decade amid relatively stable wheat production, a significant shift in dietary preferences toward more wheat-based foods, and a growing population. Although In barely exported any wheat over the past several years, in 2020/21, India suddenly emerged as the primary supplier to Bangladesh(USDA, September 2021).
